

CRAZYANTS
GUARDIANS OF THE METAVERSE

INTRODUCTION

ABOUT CRAZY ANTS

Crazy Ants is a 5k fully animated GameFi project featuring free-to-play game with unique “Play-to-Own” mechanics. Landed on Polygon, the game is already playable where players can raid dungeons to loot powerful gears and battle each other to defend their own colonies.

Incepted in 2021 with a mission to develop fun games with open arms to both web2 and web3 audiences, we grew into a highly diverse team of game developers from around the world.

VISION

Our vision is to become a leading gamefi project that empowers gamers to have fun and earn rewards through free-to-play games. While lowering the barrier for web 2 players to entry, we strive to create a deflationary ecosystem and a vibrant community leveraging the power of NFTs to incentivize and reward our players.

GAME LOOP

Crazy Ants is a free-to-play game, but only NFT holders can monetize from the gameplay. The game is a turn-based dungeon crawler following the loop of:

1. Loot gears from raiding dungeons.
2. Earn tokens by burning gear NFTs.
3. Mint new Crazy Ants NFTs by burning tokens.

LOOT GEARS

Raid dungeons to get gears dropped from the gameplay.

EARN TOKENS

Trade Gear NFTs or burn NFTs into Tokens to monetize.

MINT NEW NFTS

Mint new Crazy Ants NFTs/supporting NFTs by burning tokens.

NFTS

Crazy Ants NFTs got 1 key attribute: Growth Factor. It functions as the multiplier for increasing the overall stats of a character. E.g. a character gets +100 ATK from gears and an NFT with a higher growth factor can achieve higher stats to survive longer in a dungeon raid. A player has limited times in a day for raiding a dungeon, more NFTs the player hold, more chances one has to raid dungeon to loot gears.

01

Higher growth factor =
Stronger ant = Rarer NFT

02

NFTs with higher growth factor are more
likely to loot higher-tier gears from game

GEARS

Gears are the main collectibles and the only source of stats and skills. There are 5 tiers of gears in-game, which are Common, Rare, Epic, Mythic and Legendary, There are 12 skills randomly distributed to gears, higher-tier gears are more likely to have more skill slots and a higher rate of casting the skills in a battle. All non-NFT gears can be transformed to off-chain in-game currency CDR for HP recovery.

01

Gears provide stats and skills, Skin NFTs provide a multiplier for the stats

02

Growth rate is a given skin NFT attribute
Higher Growth = Stronger Ant

TOKEN

\$CRA token is the **DEFLATIONARY** utility token that drives the CrazyAnts ecosystem. It will have the initial allocation of 0 and can only be minted through burning gear NFTs or farmed from Colony NFTs. Tokens can be used to:

Mint new NFTs in Crazy Ants ecosystem, trade NFTs on the in-game marketplace, cover entry fee for PvP tournaments, convert to other cryptocurrencies.

01

Team will buy back tokens to establish a rewards pool for sponsoring PvP tournament and airdrops

02

Colony NFT holders can farm \$CRA when the strategy game mode launches

MARKETPLACE

Crazy Ants marketplace is built exclusively to serve the trading of NFTs in Crazy Ants ecosystem. The reason we have it with Magic Eden and Opensea's presence is that: We want traders to save up that 2-2.5% platform fee. It helps us reward traders back in MATIC, and will only focus on the in-game attributes, so you can always snipe the strongest ants within your budget range.

01

Crazy Ants marketplace was readily available on the mint day

02

We did a massive sweeping floor contest rewarding 2,000 MATIC on mint day

PVP BRAWL

We worked on this PvP feature since we're tired of the rarity ranking system that seldom provides additional utilities or benefits for holding rarer NFTs. In Crazy Ants, Rarer Ants are stronger Ants, period. So once you secured and equipped your NFTs, try engaging in a brawl to put your strength to the test.

01

Brawl was readily available on the mint day

02

You can throw trash talk to your opponent to heat things up

ROADMAP

ROADMAP

JULY 2023

We define Crazy Ants as a metagame where the community holds the voting rights to decide the path for future game development. So right after the Genesis NFT launch, Game release, Staking, Regeneration Event, we'll be gathering feedback for future upgrades.

01

NFT LAUNCH

02

GAME RELEASE

03

STAKING & REGENERATION

Q3-Q4 2023

We'll launch the PvP tournament, Staking level-up & level-gated raffles, and achievement system in Q3; launch a new game in Q4. Token listing, supporting NFT collections, mobile compatibility updates, and colony NFT airdrops may come anytime in between.

01

**PVP TOURNAMENT
STAKING LEVEL-UP & RAFFLES**

02

**NEW GAME MODE
SUPPORTING COLLECTION**

03

**TOKEN LISTING
COLONY NFT AIRDROP**

CORE TEAM

We have a highly diverse and passionate team with experienced game developers working for multiple genres of world-class game titles, here they are the leading team behind Crazy Ants.

FOUNDER

Karl

12 yrs+ of game development and project management experience, having launched 20+ games and expertise in web3 projects. Leading the way in gamefi innovation.

EXECUTIVE PRODUCER Gewald

8 yr+ of game development experience, responsible for the release of multiple award-winning games, proficient in game design and smart contract programming.

MARKETING DIRECTOR Jacob

Incubated multiple Gamefi projects with a daily turnover of several million USD. 5 yrs+ of Defi Exchanges working experience.

COMMUNITY DIRECTOR

Bee Vee

Seasoned community manager with years of experience in building communities and finding alpha projects.

THANK YOU
